

FCC and Federal Governement

Please leave satellite radio alone, television alone, and radio AM and FM stations. As a 26 year old American, I see many other issues at hand then regulating satellite radio, and other forms of communication. How about focusin on the current situation in Afghanistan, Iraq, Korea, and other foreign relations where your energies would be spent wisely. Your going after something that has been set in stone for nearly 300 + years, our freedom of speech! Just b/c your not making as much money off of it as other ventures in the country, please leave it alone. How about rising gas prices, or maybe even cures for certain diseases? Why satellite radio? Americans are enjoying it? Is that why? We start enjoying something and all of a sudden you need to stick your nose where it doesn't belong. I pay for this, I want this, leave it alone. I believe I speak for the millions of Americans, PAYING for this service, to leave it alone. This is a very innovative idea, and a great way for us to actually LISTEN to something different. You've got your hand in regular radio, already telling us what to listen to, leave this alone. Let us have our choice to listen to it. It's a basic freedom, choice!

Sincerely
Zach Zinser
